What Should I Do?

A Few Do's and Don'ts for You and Your Family

Enter AFTER _____ am pm

Date: _____

DO...	DON'T...
Keep all people and pets out of a treated home for at least 4 hours after service. *Not necessary to vacate if gel is used for ants or roaches.	Don't leave open food, dishes, toys, or pet dishes exposed during treatment.
Keep pets out of a treated yard for at least 2 hours after service	Don't be alarmed if you see insects immediately after service. It takes a while for full control. See page 3 for specific information on timetables for each pest.
Keep toddlers and birds away from treated areas for at least 8 hours .	For roach treatments, don't wash kitchen shelves afterwards. It's important that the treatment remain in the cabinets to keep pests out. Use shelf paper.
If you are pregnant , have asthma or respiratory problems , or have a baby under one year old , ask your doctor whether you and your family should vacate the home for the first 24 hours following treatment. We advise at least 8 and up to 24 hours under these special conditions.	Don't forget about your fish! Ideally, you should remove them from the home before treatment. If you can't, 1) Disconnect the aquarium power supply, and 2) cover the aquarium with a wet towel during treatment. This can help to reduce risks for your fish, but not eliminate them completely.
For roach and service, remove EVERYTHING from food cabinets and storage areas before treating for roaches; put items on a table or other large surface and cover with plastic before treatment.	Don't feed the pests! Vacuum regularly; don't leave food out where pests can get at it; clean up kitchen spills; don't leave dirty dishes in the sink. Follow-up will ensure they stay away
For fleas , vacuum thoroughly before treatment and have pets flea-bathed. Also vacuum aggressively for 2 - 3 weeks after treatment.	For Ants , don't be alarmed if you see <i>more</i> of them for a few days. This is normal for up to 14 days after treatment. Call if you have any questions at all.

Harbor Pest Control

(619) 584-8155

6160 Fairmount Ave Ste K, San Diego CA 92120

Caution: Pesticides are toxic chemicals. Structural pest control operators are licensed and regulated by the structural pest control board, and apply pesticides which are registered and approved for use by the California department of agriculture and the United States Environmental Protection Agency. Registration is granted when the state finds that based on existing scientific evidence there are no appreciable risks if proper use conditions are followed or that the risks are outweighed by the benefits. The degree of risk depends upon the degree of exposure, so exposure should be minimized.

If, within 24 hours following application, you experience symptoms similar to common seasonal illness comparable to the flu, contact your physician or poison control center 800-876-4766 and your pest control operator 619-584-8155 immediately.

For further information, contact any of the following: health questions; County Health Dept. 619-692-8499; application information; county agriculture commissioner; 858-694-8980 or 858-694-2739, SPCB information; 916-561-8708, 2005 Evergreen St. Ste. 1500, Sacramento, CA 95815-3831.

Rodenticides: If ingested, you may experience nausea, vomiting, loss of appetite, extreme thirst, lethargy, diarrhea or bleeding. Contact your physician or the poison control center at 800-876-4766 immediately.

A few words about what to expect:

We know you want the pests gone as soon as possible. We've used the strongest, toughest treatment we can to get them out, fast.

Full effectiveness builds in a matter of days. To make things a little less uncertain for you, we've created this reference chart. If you have questions about how long to wait to see the fullest, best results of the treatment, please check this chart. And if you have any questions after that, please, **do not hesitate to call.**

PEST	Percent of Control	Maxiumum Control
Ants**	75% within 24 HRS	21 days
Bees/Wasps	90% within 48 hrs	5 days
Carpet Beetles	70% within 36 hrs	30 days
Crickets*	80% within 36 hrs	30 days
Drywood Termites	90% within 72 hrs	30 days
Earwigs	65% within 36 hrs	30 days
Fleas	80% within 24 hrs	21 days
Mice	75% within 36 hrs	15 days
Rats	50% within 5 days	30 days
Roaches - German	75% within 36 hrs	30 days
Roaches - Oriental	70% within 48 hrs	25 days
Silverfish	50% within 24 hrs	30 days
Subterranean Termites	90% within 72 hrs	30 days
Ticks	75% within 24 hrs	21 days

Please note that **spiders** are not insects, and although some types of spiders respond to pesticides, usually we need to control them by eliminating their food supply—insects.

*If you consistently hear a sound like a **cricket in the same spot**, check your **smoke alarm**. Sometimes smoke alarms chirp when they want a new battery.

We Want You To Know

Your home was treated with...

- Bora-Care (Disodium Octaborate Tetrahydrate)
- CB 80 (Pyrethrin, Pipernol Butoxide)
- Chloropicrin (Used As Warning Agent)
- Cy-Kick (Cyfluthrin)
- Delta Dust (Deltamethrin)
- Demand CS (Lambda-Cyhalothrin)
- Demon MAX (Cypermethrin)
- D-Force (Deltamethrin)
- Dagnet (Permethrin)
- Dri-Die (Amorphous Silica Gel)
- Drione (Pyrethrin, Ammonium Fluosilicate)
- First Strike (Difethialone)
- Gentrol Igr Pt Source (Hydroprene)
- Maxforce Bait Stations - Roach (Fipronil)
- Maxforce Bait Stations - Ant (Fipronil)
- Maxforce Select Roach Gel (Fipronil)
- Maxforce Fine Grn. Bait (Hydramethylon)
- Maxforce Ant Bait Gel (Fipronil)
- Methyl Bromide
- Mpede (Potassium Salts Of Fatty Acid)
- Phantom (Chorfenapyr)
- Pt Tri Die (Pyrethrins-Amorphous Silica Dioxide)
- Rozol Pkt Gopher (Chlorophacinone, Liphadione)
- Talstar CA Granules (Bifenthrin)
- Termidor (Fipronil)
- Tim-Bor (Disodium Octaborate Tetrahydrate)
- Uld 100 (Pyrethrins)
- Ultracide (Pyriporxylen, Pyrethrins & Permethrin)
- Vikane (Sulfuryl Fluoride)
- Wasp Freeze (d-trans Allethrin, Phenothrin)
